## Authorize JustGiving to connect to Strava

Improve your fundraising and smash your target by automatically posting your Strava activities to your JustGiving page

**JustGiving will be able to:**

- View data about your public profile (required)
- View data about your activities

**Your activities will not contain heart rate data**

It looks like you still need to allow Strava to process your heart rate data. Please do this in the Data Permissions section in Strava's settings before you upload your next activity.
