Disclaimer: Full Potential is an independent service provider.

Mind does not endorse or guarantee the services of Full Potential, and you take part in a training programme recommended by Full Potential at your own risk.

It's your responsibility to consult with your GP to make sure that you're medically and physically fit and well enough to take part in a Full Potential training programme and – as per our **terms and conditions** your fundraising challenge.

Mind will not be held responsible for any injury or illness related to your training or taking part in a fundraising event.

We know physical activity can be an amazing way to support mental health. However, it isn't helpful for everyone all the time.

It's important to recognise that some of us can develop an unhealthy relationship with physical activity. Anyone can develop an unhealthy relationship with exercise.

But this may be more likely if you have certain types of mental health problems. There's lots of tips for developing a healthy relationship with physical activity on **Mind's website**.

Type of session	Training zone	Perceived effort level (1-10)	How it should feel – The talk test
Easy effort walk	4 – 4	40-50%	You can speak in complete sentences, totally conversational. Keep to this effort the whole way.
Easy cross training (gym class)	6 – 7	65-70%	We have plenty of cross training in the plan, it enables us to make fitness gains whilst mixing up the training. These sessions can be a mixture of gym classes, or equipment like the elliptical training or rowing machine. Aim for an effort level that leaves you slightly breathless at times.
Steady effort walk	4 – 6	50-60%	You can speak in complete sentences, totally conversational. You will find the effort level rises as you go up and down hills.

How the plan works

This 16 week plan will prepare you to go from a base of minimal training to being able to take on a 50km challenge in 16 weeks.

This plan contains walking and cross training. We gradually build up the time on your feet so you have done a couple of 4 hour walks before the big day. Try and find off-road routes for your walks, ideally with plenty of undulations (up and down hills).

It's important that you train at the right effort level and intensity to ensure you're training to reach your full potential. Most people think that training "harder is better" so we end up training too hard, which can result in feeling tired, getting ill or picking up an injury.

Understanding what each session is trying to achieve and how it should feel is the way to train smart. To the left, is our guide to the training sessions that you'll find mentioned in your training plan and a note of how they should feel as a 'talk test'.

Making the training plan work for you

You'll probably not be able to follow the plan as it is set out. We've written our plans with this in mind.

- Key sessions for each week are highlighted in **BLUE**. These are the non-negotiable sessions that you need to fit into your diary in order to run your best race.
- Sessions in **BLACK** are the supplementary training within the plan. These sessions are the ones to drop in your week if you can't fit it all in, although we hope you can find the time.
